Outstanding silicone breast prostheses tailored for you

Dorset Orthopaedic’s silicone breast prostheses are individually customised to give a natural skin appearance and realistic feel.

As experts in silicone manufacturing, every cover is sculpted uniquely for each individual by our technicians trained in fine art. Our high-definition product gives the wearer confidence and allows her to enjoy normal, everyday activities with a positive body image and revitalised self-esteem.

Our silicone breast and/or nipple prostheses are ideal for uneven breast development and are an alternative for those who either cannot have, or do not wish to have breast reconstruction following mastectomy.

Features & Benefits

- **Customised** - Each prosthesis is custom designed to suit each woman’s individual needs.
- **Realistic Appearance** - Colour matched to replicate the contralateral breast and surrounding skin tissue.
- **Natural Feel** - Soft silicone gels create the lifelike feel and texture of a natural breast.
- **Secure** - Adhesive ability ensures the product affixes securely and comfortably to the skin without leaving sticky residue. It will not lose its adhering property - only requiring occasional washing to rejuvenate.
- **Comfortable** - Soft silicone gels mould naturally to a woman’s body, blending with sensitive skin and complex scar tissue.
- **Water Resistant** - Completely waterproof and will not lose adhesiveness when swimming or bathing.
- **Hygienic** - Simply wash with warm soapy water when required

Breast prostheses customised for you

One thing Dorset Orthopaedic enjoys is a new challenge so when we were approached by Lesley, with the request to make a customised silicone breast cosmesis, that looked and felt like part of her, we listened to her needs and adapted our skills to develop a realistic breast prosthesis. We knew we had to produce a silicone breast that was not only extremely life like but was also soft enough to pass the “Hug Test” - when two people hug the breast feels comfortable and natural. The breast prosthesis also needed to be easy to put on & off, and easy to clean.

Full or Partial Breast Prosthesis

Our full or partial breast prosthesis can transform your shape, creating a natural appearance and boosting your confidence. Created from soft silicone gel, our custom designed breast prostheses fit comfortably and naturally to your body, making it possible to wear the bra of your choice. The product can be easily applied and removed effortlessly with no residue.

Nipple Prosthesis

A nipple cosmesis is an alternative solution for those who may not want to proceed with nipple reconstruction or a nipple tattoo. This can be unilateral or bilateral depending on your needs post surgery and will complete the appearance of the breast, creating a realistic finish.

Designed to look as natural as possible, the nipple fits securely to the existing breast, giving a natural appearance that boosts confidence.

Lesley underwent a mastectomy in 2010 as a result of breast cancer and after finishing chemotherapy in 2011 she felt her prescription prosthesis was inadequate and wanted an alternative solution.

Lesley did not want to opt for reconstructive surgery, as she didn’t want to be out of work or her routine any longer than necessary.

I now have a breast cosmesis that looks exactly like the remaining breast, thus making me feel whole

I feel completely at ease with myself and more confident. It has become a unique part of me and I wear it continuously

Simple steps to create your breast prosthesis

Every woman is unique and we understand that body image post-surgery, chemotherapy and/or radiotherapy is extremely important to the physical and emotional well being of the individual. As this is a sensitive time, our clinicians and technicians are here to guide you through the process, to ensure a respectful and discreet service throughout.

1. During your first consultation our considerate clinicians will discuss with you your personal requirements and expectations.

2. Next, your chest will be cast in order to start creating the product to specifically suit your body.

3. You will be included in every step of the process, consulted on the shape and colour of the product and fine details of the skin and nipple. This process is an integral part of your physical and emotional journey.

4. Before the prosthesis is completed, you will be invited to attend fitting appointments where the final details can be checked and confirmed - this can sometimes take between 2-3 appointments depending on complexity.

5. Once you are entirely happy with the appearance and fit of the product you will then take final delivery of your breast prosthesis.

To talk to a member of our team in complete confidence or to book an initial consultation to find the right solution for you, call Megan at our Ringwood Clinic +44 (0) 1425 481 794 or email us at enquiry@dorset-ortho.com
